

## Metal bellows coupling, TYPE 53 - up to 25 Nm

### Characteristics:

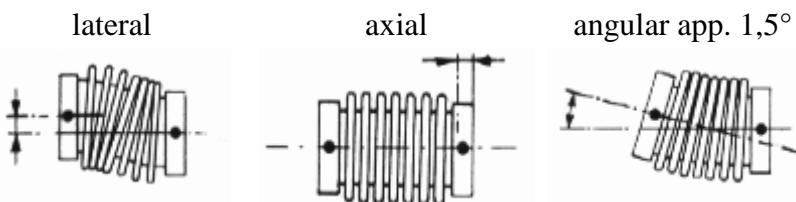

- Corrosion-resistant aluminium hubs, stainless steel metal bellows
- Operational temperature up to 100°C (please call us in case of higher temperatures)
- No backlash
- High rotational speeds possible
- Maintenance free and non-wearing

### Application:

- For installation in
- Stepped motors
  - Impulse drives
  - Measuring systems
  - Low output drives, etc.

Simple clamping is obtained by use of the clamping screws (DIN 916). The relationship between the moment of inertia and the torsion rigid is very pleasant, because of the thin metal bellows.

### Shaft misalignment

### TYPE 53 up to 25 Nm , mounting hub glued
